Title: Training clinical providers in evidence-based hypnosis for cancer pain management

Researcher: Guy H. Montgomery, Ph.D.

1425 Madison Avenue, Box 1077, New York, NY 10029

212-659-5561

The purpose of this research study is to evaluate the effectiveness of a training program, which consists of an E-Learning component and a live workshop component, train cancer care providers to deliver hypnosis to help patients manage cancer pain. Specifically, we want to see if the training program we have developed can improve providers' knowledge, skills, attitudes, and confidence using hypnosis to manage cancer pain.

Additionally, we want to see how satisfied trainees are with the program, and to learn how trainees apply the skills they've learned in the course to their clinical practice. You are being asked to take part in a research study because you are licensed, license-eligible, or certified in your healthcare profession, or can demonstrate current enrollment in an accredited cancer care provider training program; and, because you currently, or plan to (e.g., upon graduation), deliver clinical care to individuals with cancer.

Being in a research study is completely voluntary. You can choose not to be in this research study. You can also say yes now, and change your mind later.

If you agree to take part in this research, you will be asked to participate in an educational program consisting of three parts.

1. E-Learning modules –You will participate in online educational training, which will include watching videos (e.g., lectures, demonstrations), taking some brief quizzes and participating in clinically-relevant exercises.
2. A Live workshop – Upon completion of the E-learning modules you will be invited to participate in a live, two-day workshop that will be hosted at Mount Sinai Medical Center in Manhattan. There will be two opportunities each year to attend. For non-local participants, we can reimburse some of your travel to and from Mount Sinai. We can also partially reimburse costs of lodging, meals, and local transportation. Specifically, round-trip airfare to and from the course site for non-local participants will be reimbursed up to \$600 with stipulations (e.g., must fly coach). Partial costs of housing, meals, and local transportation while participating in the course can be requested up to \$581.25 per participant. Following attendance at the workshop and submission and approval of receipts, you will receive a check from Mount Sinai for the reimbursement.
3. Follow-up Survey – Three months after the workshop, you'll be asked to fill out an online survey to learn more about how you used what you learned in the course in your clinical practice.

Your participation in this study will take about 6 hours online for the E-Learning portion (note: you can take as long as you want to complete the E-learning modules, this is

entirely at your own pace), two days (about 8 hours per day) for the live workshop, and about 15 minutes for the follow-up survey. We expect that 400 people will take part in this research study.

You must be at least 18 years old to participate. If you are younger than 18 years old, please stop now.

The possible risks to you in taking part in this research are:

- Any emotional distress that might accompany learning about cancer pain and its effects on cancer patients and survivors, or that might accompany being evaluated on clinical skills (e.g., skills associated with using hypnosis for cancer pain). There is also the risk of potential loss of confidentiality of data.

The possible benefits to you for taking part in this research are:

- Professional training in hypnosis skills for managing cancer pain.
- Knowing that you are contributing to improving future educational and training programs focused on hypnosis and cancer pain management.

To protect your identity as a research subject, the researcher(s) will not share your information with anyone. In any publication about this research, your name or other private information will not be used.

If you have any questions about this research, please contact the Researcher at 212-659-5561. You can also call the Program for the Protection of Human Subjects Office at 212-824-8200.
